General

The MP-mountings (Multi Purpose) are developed to offer excellent passive and active vibration isolation for various applications. Next to offering excellent isolation the MP-mountings internal deflection limiter avoids overload and allows use for mobile applications on for example trucks and on board of ships. The geometry of the metal top offers protection to the natural rubber against oil and ozone.

Typical applications:
- Generators
- Engines
- Fans
- AC-units
- Cooling equipment
- Electro motors
- Cabinets
